

HIRUNA DE SILVA

FRESH COMPUTER ENGINEERING GRADUATE

Mobile: +94 76 423 1391 | Gmail: hirunadesilva0422@gmail.com | Portfolio: <https://hirunad-portfolio.vercel.app>
GitHub: <https://github.com/HirunaD> | LinkedIn: <https://www.linkedin.com/in/hirunad422>

PROFILE

A recent Computer Engineering Graduate with hands-on experience in full-stack development using the MERN stack, JavaScript, and TypeScript. I have developed responsive web applications, integrated databases, and conducted unit and API testing to ensure software quality and reliability. I am a proactive problem-solver who enjoys learning new technologies, writing clean code, and collaborating in team environments. I am eager to contribute my technical skills to a dynamic software engineering role and create impactful solutions.

WORK EXPERIENCE

Intern Software Engineer BotCalm (Pvt) Ltd

July 2024 – Nov 2025

- Engineered scalable, full-stack web applications using React.js, Next.js, and Node.js, collaborating with cross-functional teams to deliver secure, high-performing, and responsive user experiences.

Trainee Software Engineer Tetherfi (Pvt) Ltd

March 2026 – Present

- Engineered and optimized a comprehensive PBX Administration UI, delivering an intuitive, highly responsive platform that streamlines complex telecommunications management and system monitoring workflows.

PROJECTS

Intelligent Document Information Extraction and Processing Toolkit (Final Year Project) ([Link](#))

Description:

- Developed an AI-powered web application that automatically extracts, classifies, and structures content from Sri Lankan Extraordinary Gazettes, tracks amendments and version history in Neo4j, and enables domain-specific search, analysis, and retrieval for legal and policy users across government sectors nationwide.

Technologies:

- React, TypeScript, Python, FastAPI, NLP, LangChain, Neo4j, Vector Databases, RESTful APIs

Key Contributions:

- Designing, developing and integrating the full-stack application with intelligent document extraction capabilities. Implementing neo4j graph database to save and retrieve all the legal documents data.

Reservation Management System (Group Project) ([Link](#))

Description:

- Developed a microservices-based Reservation Management System with separate frontend and backend services containerized using Docker. Implemented secure RESTful APIs, stall reservation workflows, and efficient data handling with MongoDB and Redis caching. Contributed as both a frontend and backend developer, building the UI in React.js with Redux for state management and developing scalable backend services with Node.js and Express.js.

Technologies:

- React.js, TypeScript, Tailwind CSS, Node.js, Express.js, Spring Boot, MongoDB, Kafka, Redis

Key Contributions:

- Integrated the backend analytics services with the frontend, ensuring smooth data flow and real-time reservation insights.

StudyBuddy - Personalized Study Plan & Note Generator (Ongoing) ([Link](#))

Description:

- Designing and developing an AI-powered StudyBuddy platform to help CS and Engineering students make informed academic decisions through personalized study planning and structured note generation.

Technologies:

- React-Vite, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, LLM API, REST APIs

Restaurant Management System (Group Project) (Link)

Description:

- Participating in a software group project implementing a Restaurant Management System to Leon’s Kitchen, Galle.

Technologies:

- React, Next.js, Redux Toolkit, MUI, Bootstrap, Stripe, Jest, Cypress, Selenium-Webdriver, Mocha, Postman

Key Contributions:

- Integrated the backend analytics services with the frontend, ensuring smooth data flow and real-time reservation insights.

Cake Shop Management System (Link)

Description:

- Developed a e-commerce platform using React.js with Tailwind CSS for the front-end. Integrated user-friendly features like product browsing, cart management, and dynamic routing with React Router.

Technologies:

- React.js, TypeScript, MUI, Tailwind CSS, Easy-Peasy

PROFESSIONAL QUALIFICATIONS

Bachelor of Science, Computer Engineering 2021 – 2025
Faculty of Engineering, University of Ruhuna, Galle

G.C.E. Advanced Level 2019
Rahula College, Matara
Combined Mathematics - A, Chemistry - B, Physics - B

TECHNICAL SKILLS

Programming Languages	: JavaScript, TypeScript, Python, Java, C#, C++, Haskell
Frameworks & Libraries	: React.js, Next.js, Node.js, Express.js, Tailwind CSS, MUI, REST APIs
Database	: MongoDB, MySQL, Neo4j
DevOps	: Docker, Kubernetes
Tooling	: Git, GitHub, VS Code, Jira
Testing	: Jest, Selenium, Mocha
State Management	: Redux Toolkit, Zustand, Easy-Peasy

CERTIFICATION AND ACHIEVEMENTS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional – Offered by Oracle University (2025)
Docker for Absolute Beginners with Hands on Projects – CoDeKu DevOps Academy (2025)
Developing Cloud Apps with Node.js and React – Coursera Offered by IBM (2024)
Machine Learning with Python – Coursera Offered by IBM (2024)
OOPs in Java – Great Learning (2024)
Introduction to Artificial Intelligence – Great Learning (2024)

COMPETITIONS

Finalists in CODEFEST AI SPRINT - Organized by SLIIT
Participated in Eminence 3.0 - Organized by IEEE Student Branch, University of Ruhuna

EXTRACURRICULAR ACTIVITIES

Former Member of AIESEC in Ruhuna
Participated in ‘Mehewara’ Mathematics Seminar Series for Ordinary Level school students.
